

Amendments to the Specification:

Please replace the paragraphs beginning at page 3, line 4, with the following redlined paragraphs:

---

β' It will be readily apparent to those of skill in the art that any of the camptothecins can be formulated in accordance with the present invention. In a preferred embodiment, the present invention provides liposomal topotecan unit dosage forms. In addition, it will be readily apparent to those of skill in the art that any of a variety of lipids can be used to form the liposomal compositions of the present invention. In a presently preferred embodiment, the lipid comprises a mixture of sphingomyelin and cholesterol, preferably at a sphingomyelin:cholesterol molar ratio (by weight) of about 30:70 to about 60:40 to about 70:30 to about 40:45.
